Region	Phone
Americas	+1 800 447-2273
APAC Japan	+604 291 3600 +81 3 6262 1887
Europe, Middle East, and Africa	+44(0) 134 432 8300

When connected, select **Option 1** for Commodity Insights, and then **Option 3** for Commodity Insights.

## Bugs

The following bug fixes have been made since the release of Petra Standard 2023 v3.17.2:

- Petra 2023 Hot Fix 3 Release (April 14, 2024)

Description	Case Number
Renamed Historical Operator/Hist Operator in Select Wells by Data dialog to match with the Well tab	02183572
Fixed a crash which happened when switching a project to a WGS 84 projection with "N".	02213278
Fixed TAB key jumping without order in two dialogs	02323795
Petra no longer closes when opening a project with a specific projection setting	02279107
Fixed if a well only has proposed survey, it doesn't show in map with the "Actual and Proposed survey" option.	02197945
A connection issue in the Petra Map Module when using WMS imagery has been fixed.	

With this release, two files have been added to the installation folder (Geoplus 1):

- **gpmapi.exe.config**—updates the TLS settings when using the WMS tools in Map Module for the free spatial layers provided. This is exclusive of any WMS settings connecting to external servers.
- **fixserver.bat**—updates the server pathway for LIC files that have been edited or customized. This file needs to be placed in the folder where the LIC files for raster images are stored. Double click on the bat file to run, and the LIC files will automatically be updated with the correct server pathway. This is to resolve an issue with rasters images stored on the IHDC.

- Petra 2023 Hot Fix 2 Release (November 14, 2023)

Description	Case Number
The process of saving wells in Main to a WSN list has been improved.	01958284
The West Virginia production file import has been updated to the correct format.	02065126
The Log Map now correctly posts all wells from the Well Log Bulk Loader.	02146102
A petraihis.aut file error no longer displays after using the Well Log Bulk Loader.	02147114
A crash under certain circumstances when selecting WGS 84 UTM Zone 39N as the map projection has been fixed.	02148891
A compute crash when extracting landing location has been fixed.	02149149
Plotting depths along a deviated well path now works as expected when you choose to label based on MD.	02149969

An issue with symbol highlights with data posting has been resolved.	02162105
--	----------

- Petra 2023 Hot Fix 1 Release (September 12, 2023)

Description	Case Number
Selected zones now persist when selecting Wells by data > Zones > [zones or tops data]	
Depth ticks in the Map module now post correctly for true north and grid north surveys.	02029906 02005528
The Project > Direct Connect sub-menu has been corrected to accurately reflect available options.	
An issue with the text size setting in certain grids has been resolved.	01999076
